CITALI SERIES: TEXAS COLLECTION

Inspired by the diverse Texan landscape, Koni Materials® introduces the Citali Series, The Texas Collection. The Texas Collection is a natural stone product that offers a variety of high-quality 6 X 24 natural stacked stone panels: Aransas, Ligai, Monahans, Salado and Sauz.

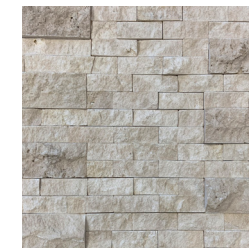

ARANSAS

LIGAI

MONAHANS

SALADO

SAUZ

THE BENEFITS

1. DURABILITY

Natural stone will not fade or wear over time; in fact it looks better with age.

2. NATURAL COLOR

The vibrancy and life of natural stone cannot be mimicked or captured by any painted product.

3. UNIQUENESS

Natural stone has its own unique characteristics; no two stones are exactly alike because it is not made from a mold

4. WORKABILITY

Natural stone can be shaped, trimmed and chiseled to take on any specifications without losing any coloration or effect.

5. EASY MAINTENANCE

Natural stone can be pressure washed without consequence; whereas manufactured products may be damaged.

6. COST EFFECTIVE

Although natural stone may be more expensive than a manufactured stone, you save in the long term as it will more than likely not need to be replaced as soon as a veneer will.

7. ENERGY EFFICIENT

Natural stone is environmentally friendly because stone's thermal mass provides natural insulation, which helps the planet and lowers your energy bills.

8. EASE OF INSTALLATION

One of the benefits of using Citali is the ease of installation. While you do need a wall that is structurally sound and suitable for the stone, the panels come in a set size rather than varied pieces which need to be hand selected and put in place.

THE SPECS: CITALI SERIES

	SIZE	WEIGHT	SQ FEET	PANELS
EOS	6 x 24 x 0.4 - 0.8 in	10 lb (per panel)	5 sq ft (per box)	5 (per box)

THE PROJECTS

KONI MATERIALS SHOWROOM

We chose to install Citali in our own office space, featuring our natural stone paneling in Midas for the interior accent walls. This choice helped us maintain a minimalist, bright aesthetic while creating an ideal work environment.

FAQ

1. IS CITALI A PANEL?

Yes, the Citali Series is a 6x24 natural stacked stone panel that comes in various textures, thicknesses and stones.

2. WHAT TYPE OF ADHESIVE SHOULD I USE?

For interior and exterior applications, we recommend mortar made for large format tiling.

3. CAN I USE CITALI AS FLOORING?

Technically yes, but we do not encourage it as the panels are uneven and would be difficult to walk on.

4. CAN I MOUNT SHELVES OR FRAMES ON CITALI?

Yes, you can drill into Citali for whatever purpose using a masonry drill bit. Make sure you wet the stone to keep it cool.

5. WHAT KIND OF SEALANT SHOULD I USE?

You can use any sealant made for natural stone. Know that some topical sealants may alter the color of your stone, so do a test before coating your whole application.

6. HOW DO I CUT CITALI?

You can cut Citali by using a wet saw with a diamond blade.

7. HOW DO I CLEAN THE STONE?

Since the Citali Series is natural stone, you can clean it however you'd like (even power washing if on exterior).

8. HOW LONG WILL IT TAKE TO GET MY PRODUCT?

We have most of the Citali Series in stock at our warehouse, so it takes only 3-5 business days to ship out from the date we receive the order. However, if the shade you desire is out of stock, it could take 2-3 months depending on where in the world the stone quarry is located.
